

Embraer E190

A groundbreaking concept in the air

Embraer E190

No. of aircraft	1
Max passengers	97
Seat maps	9C/88Y
Range	2,400nm
Cruise speed	520mph
Cruise altitude	39,000ft

The Embraer E190 LR, a regional jet with mainline capabilities, is the latest addition to our modern fleet.

Boasting an impressive range of 2,400nm and the capability to operate to restrictive airfields, such as London City, Florence, Berne and San Sebastien, together with an impressive range of 2,400nm, the E190 is ideal for short hops or longer routes. The aircraft also boasts one of the most spacious interiors among single-aisle aircraft.

Available in single-class configuration with 100 standard seats or in a two-class layout with nine business and 88 standard seats, the aircraft fills a gap in our fleet for smaller capacity requirements.

Equipped with advanced avionics and fuel-efficient engines, the E190 LR is both reliable and efficient.

It is the perfect aircraft to fulfil ACMI requirements on behalf of regional airlines as well as ad hoc charter flight operations for smaller groups.

Standard seats

Our freshly installed standard seats from Recaro are smart, comfortable and lightweight. In our dual class layout, they offer a minimum 30-inch pitch between rows. A new single-class cabin, with 100 of the same Recaro standard seats, is in the pipeline.

Premium seats

In our dual class layout, there are three rows of premium seats at the front of the cabin. The premium seats are configured in a 2-1 layout with a pair of seats on one side of the aisle and a single seat on the other. Our business seats offer a minimum 36-inch seat pitch between rows.
